DEPARTMENT OF COMMERCE.

TARIFFS.

New Delhi, 1st 1939, March 20th.

No. 117-T. (2/35)—The Tariff Board which in 1934-35 investigated the claims of the Sugar Industry for protection, recommended the grant of protection for a period of fifteen years, the measure of protection to be Rs. 7-4-0 per cwt. for the first seven years and Rs. 5-4-0 for the remaining period. The Sugar Industry (Protection) Act of 1935 gave effect to these recommendations, except that falling to the measure of protection during the second part of the protection period. The Act, however, provided, that before the first March 1938 a further enquiry should be made to ascertain what degree of protection was needed by the industry for the remaining period of protection. This statutory enquiry was ordered by the Tariff Board under the sanction of the Government of India No. 127-N (1/37), dated the 15th March 1937. The Board submitted its Report in December 1937 but it was not found possible to reach conclusions of the Report before the end of March 1938 and the protective duty then in force was accordingly continued for another year by a Special attachment of the Act of 1935.

3. The main recommendations of the Board are as follows:—

(1) The free selling price of Indian sugar is Rs. 5-15-0 per cwt. to which should be added Rs. 200 per annum for freight and 50 paise for quality, making roughly Rs. 7-15-0 per cwt. Java sugar sold is landed at Rs. 7-0-0 per cwt. and the protective measure should be Rs. 5-4-0 per cwt. or Rs. 7-0-0 per cwt. This amount of protection should be granted for 15 years.

(2) Provision should be made for the maintenance of price should be on the understanding that it bears the same rate of duty as Java.

(3) No special protection is necessary for the sugar industry, apart from the protection granted to sugar.

(4) Research work on the agricultural side is inadequate and an extension of 20 p. per cent. from the same duty should be made for research and assistance to provincial agricultural departments.

(5) A marketing survey of the sugar industry should be undertaken.

(6) The additional excise duty levied in 1935 has had unfortunate consequences for the sugar grower and manufacturer. At the prevailing level of prices the present rate of excise duty is out of proportion.

(7) The recommendations of the industry under para 6 of the Board's report in the light of the purposes of the legislation concerning export of sugar should be considered.

3. The recommendations of the Board besides dealing with the several of protection required, namely, provision which are attached to various of the relevant of the industry in various parts and in some cases nothing previously contemplated. These proposals cover a very wide field and necessitate consultation between the Central and Provincial Governments and the other interests concerned, and the Government of India have accordingly referred their recommendations to the various authorities dealing with the measure of protection.

4. The Board has presented an elaborate plan of selling price of indigenous sugar and the landed price of imported sugar as the measure of protection required. The Tariff Board's price is fixed at Rs. 7-15-0 per cwt. and the landed price to be Rs. 7-0-0 per cwt. and the difference being Rs. 7-4-0 per cwt. or Rs. 5-4-0 per cwt. (equivalent to Rs. 5-4-0 per

cwt.) is the amount of protection required for the remaining period of protection.

5. The Government of India have carefully examined the detailed calculations on which the Board has arrived at its estimate of cost of production and price, and are disposed to consider, in the light of recent information, that the figures proposed by the Board for various items, notably manufacturing costs and profit, and for adjustment of difference in quality are acceptable in substance. They also take into consideration the suggestion that Java sugar, the selling price of which is fixed, should be the measure of protection, and in fact, on the basis of the figures in the Board's report, the landed price of Java sugar would be Rs. 7-4-0 per cwt. and the difference being Rs. 5-4-0 per cwt. or Rs. 7-0-0 per cwt. (equivalent to Rs. 5-4-0 per cwt.) is the amount of protection required for the remaining period of protection. The Board's figures are based on an average and partly temporary conditions in Java and it is larger and more exact market conditions have occurred since the Board wrote its Report and with the increasing working of the International Sugar Agreement there has been a steady increase in the price of sugar in the world market.

6. There is another, and even more important factor, namely the recent changes in the Indian economy which must be taken into consideration, and when working the proposed protective duty. While the construction of the Tariff Board's report has been in progress, the situation has changed so fundamentally that the report—though so fresh in the Board's mind—may not be of much use. The application to the sugar industry of an industrial and economic system of control by the United Provinces and Bihar Governments and their desire to keep a protective rate in force applied to the industry and to induce economic price regulations more rapidly than in the past have produced new and unexpected conditions which have so modified the basis of the Board's Report that it is not clear how to apply the level of protection for the whole of the unoccupied time within a further enquiry. The industry, however, is still in an unstable position and it must be given sufficient time to bring the new conditions before a further investigation can be made by the industry. The Government of India propose, therefore, to fix the amount of protection for a period of two years, from 1st July 1939 to March 1941, pending a further investigation to be held in 1940 in time so as to enable a decision to be made as to the question of protection for the remaining two years from April 1st 1941. For the two years, April 1st 1939 to March 1st 1941, the Government of India propose to impose the present protective duty less 50 p. per cwt. This comparatively high price being for Java sugar against the free India sugar, will have the effect of inducing the industry to improve its position.

7. The Government of India must also take the Board's remarks on the income tax on sugar duty into consideration. In paragraph 2 above a finding was set out in the Board's Summary to the effect that the present rate of excise duty and such a proportion of the then prevailing level of price has been quoted. If the body of the Report is referred to, it will be seen that the finding is not supported by the Board's evidence. It is not clear (unavoidable) that there should not be absolute standard as to what is the appropriate level for various taxation. In the case of sugar, the Board's recommendation is that the rate of duty should be 20 p. per cwt. or 50 p. per cwt. (equivalent to Rs. 5-4-0 per cwt.). It is referred to the Board's evidence that a reduction of duty is necessary when the price of sugar is as high as it is at present, and it is also the case that a fair price for cane to the grower and a reasonable margin of profit to the manufacturer. This conclusion, derived from the evidence before the Board, is in the light of the fact that the Board has a duty to make a fair price for cane to the grower and a reasonable margin of profit to the manufacturer. This conclusion, derived from the evidence before the Board, is in the light of the fact that the Board has a duty to make a fair price for cane to the grower and a reasonable margin of profit to the manufacturer. This conclusion, derived from the evidence before the Board, is in the light of the fact that the Board has a duty to make a fair price for cane to the grower and a reasonable margin of profit to the manufacturer.

8. Even taking a further view, confined to the conditions then prevailing when the Board presented its

Report, the Government of India cannot except as justified the inference that the consequence of the duty had an effect on the revenue and that it fell upon the manufacturer and thereby on the consumer. The Board says the evidence upon the following statement of Government is not sufficient to show that the paper shown was by a few cents, but that even under that view the duty was not a few cents, but a few shillings which would fall in even heavy inflation on the paper. This is an unnecessary evidence. The matter was at the time a higher developed condition which is over production, and there is nothing to show that if the duty had not been imposed there would not have been a fall in the price of paper, or not for the reason that the revenue by which the duty was imposed, indeed this hypothesis is more probable than the one suggested by the Board for the reason that it is the effect of a paper which is over production it is the natural and inevitable tendency for industry to be more liberally by the consumer.

Finally, before leaving this subject, the Government of India has continued to be in question the appointment of the part of the Board's report, the task was to determine the effect of protection against foreign competition which should be afforded to the paper industry and, with the principle already established that the protection should be subject to the amount of duty paid, in determining the rate of import duty, the level of the duty did not become relevant to that task. It was outside the scope of the Board's report on the subject of the adoption of a policy of subsidizing the paper industry as to protect the industry against the results of over-production and restricted competition within the country.

3. The Government of India propose to introduce legislation immediately to give effect to their scheme.

The following resolution of the Government of India is published—

RESOLUTION OF THE GOVERNMENT OF INDIA.

THAT—

That 51, Gazette, April 30, 1930.

No. 325—(1930)—The protective duty imposed on imported magazine (which will continue on the 1st March 1931) in their resolution No. 325-2 (1929), dated the 30th December 1929, the Government of India referred to the Tariff Board the question whether any and if so what protective measures should be continued beyond that date. The Board has submitted its Report which is published for general information.

2. The Board recommends that protection should be extended to the magazine industry for a further period of seven years and has proposed a protective duty of seven 1/2 per cent, on imported magazine.

3. The Government of India accept the Board's recommendation in respect of the further period of protection but consider the rate of protective duty proposed to be too high.

4. In arriving at the tariff ceiling for magazine the Board has rightly taken into account the freight advantages which the Indian producer has to take in favour of the foreign producer, but the error of making an allowance on that account in respect of the whole production of the industry, a considerable proportion of which is reserved to secondary markets where the Indian producer either as a net freight disadvantage or even shows a certain advantage. The Government of India are of opinion that after rectifying this error the tariff ceiling should be fixed at Rs. 3-0-0 per cent, but have accordingly decided to impose a protective import duty on magazines of fifteen 1/2 per cent, and to introduce legislation to give effect to this decision which is published before the expiry of the present period of protection.

No. 325—

The following resolution of the Government of India is published—

RESOLUTION OF THE GOVERNMENT OF INDIA.

THAT—

That 51, Gazette, April 30, 1930.

No. 325-2 (1930)—In the Government of India Resolution No. 325-2 (1929), dated the 31st December 1929, the Tariff Board was asked to recommend the quantity of the protection required by the paper and paper pulp industries in India and to report with protective measures of duty should be continued after the 31st March 1930. In an interim Report the Board found that the revenue earnings at 35 per cent imposed in 1929 on the protective duties was no longer sufficient. The Government of India consequently revised the earnings under their Department Resolution No. 325-2 (1929), dated the 20th June 1930. The Board has now reported on that Report which is published for general information.

2. The Board recommends that the duty on the Board be as follows—

(1) There should be a protective duty on imported wood pulp of Rs. 35 per ton or 35 per cent and no other drawback or relief.

(2) The duty on the protective duties of paper should be 11 per cent.

(3) The Government Tariff classification of paper recommended by the Tariff Board should be adopted with some minor alterations.

(4) The period of protection should be extended by seven years from the 1st April 1930.

(5) There should be a further enquiry at the end of the year 1930 to ascertain whether the new developments taking place in the paper industry warrant protection being extended in cases of paper not as previously protected.

(6) The recommendation of the Tariff Board in the period of protection should be extended to the Indian Paper Industry (Production) Act to the Indian Paper Industry (Protection) Act.

(7) The paper industry of the Indian Research Institute, Dehra Dun, should be accorded the same protective treatment.

3. The Government of India agree that it is necessary to continue protection to the Paper Industry, but they have not found it possible to accept the Board's recommendation with regard to the extension of protection. Government also consider that no case has been made out for the continued protection of wood pulp.

4. Protective Tariff Board when examining the need of protecting wood pulp have held the opinion that the successful development of the indigenous paper industry depends on an increasing use of bamboo as against the relatively expensive grass pulp and that the continued use of the latter would make it more difficult for the industry even to compete with protection. The Tariff Board has found that the average price of Indian grass pulp is Rs. 35 per ton or 35 per cent as against an average of Rs. 17 per ton for bamboo. The Board further stated that even the possibility of other growth has not to be proved it would be worth to invest any extension is one by their own supplementary to other growth. In the other hand the quantity of bamboo available is reported to be sufficient for the requirements of existing mills and with other construction or likely to be constructed. According to the Board's estimate the minimum of protection required for bamboo pulp is Rs. 10 per ton or 10 per cent. The Government of India, agreeing with the opinion as to the necessity of bamboo, consider that a duty for protection cannot be made on behalf of grass pulp. The figures given by the present Board show that a revenue duty of 30 per cent on duty is sufficient to protect the manufacturers of bamboo paper in India at a revenue rate and Government therefore propose to levy an imported wood pulp a duty of 35 per cent as before.

5. The Board when considering the protective duty on paper has considered the conditions of the cost of manufacture to paper made from bamboo pulp alone. It appears, however, to have been in the State for the cost of production of paper to paper. The Board accepts Rs. 100 per ton as a reasonable estimate of

the end of conversion and providing that this estimate is lower than the facts (the 14 per cent) given by the Tariff Board in 1933 and unless an addition of Rs. 50 per ton to the above estimate is made out of the cost of clearing, selling expenses, insurance, profit, main cost which came out from enquiry by the former Board but were included in the single figure for cost of conversion. The Government of India consider that the first adding point of paper, i.e., Rs. 104 4 per ton, arrived at by the Board should be maintained by leaving out these additional items of expenditure and the proportionate, proposed should be accordingly reduced from 11 pps per lb. to 3 pps per lb. in order that certain expensive kinds of writing papers may not give an account of a nominal duty, an abatement rate of 50 per cent and values as proposed be fixed on such papers.

It being the statutory assumption made by the Board, in view of the adjustments which have been based thereon, to make the basis at a long period of production it is proposed that the period of production should be those years after, standards the end of which period the conversion of production will again be referred to a Tariff Board. So that time it is probable that the maintenance of the type of paper which do not at present value production will be effectively reduced to provide reliable data for a review of the industry as a whole.

7 The Board has concluded the fact that the Indian Paper Industry (Production) Act of 1937, has been amended by the Indian Tariff Act of 1934 (No. XXXI of 1934). This question of change is immaterial does not, therefore, arise.

8 The recommendation of the Tariff Board regarding the extension and equipment of the Forest Harbours Institute will, receive separate consideration.

9 The Government of India propose to introduce legislation immediately to give effect to their conclusions regarding the amendment of the customs tariff.

ANDHRA UNIVERSITY UNIVERSITY

At a meeting held on the 15th March 1970, the Academic Council adopted the following regulations and amendments to the Regulations to the Andhra University Code (Volume II), 1958-59:—

A

1

In Chapter XXXIII (Undergraduate Examinations) of the University Code, Volume II (1958-59), page 215, add the following new paragraph at the end of section 20:—

"B.A. Hon. Degree holders of the University with Research V2 Tolugu Language and Literature shall be exempted from passing in that language under Part II of the B.A. Degree Examination."

(To come into effect immediately.)

2

Add the following at the end of footnote to page 250 of the University Code, Volume II (1958-59):—

"Logic, Indian History, English."

"Indian History, Modern History, English."

"Indian History, Ancient and Modern History, English."

(To come into effect as from the Intermediate Examination of 1971.)

3

In Chapter XXXVIII (Undergraduate Examinations) of the University Code, Volume II (1958-59), page 262, substitute the following for "(1) Methods of Component Analysis, covering four methods of correlation—"

"(1) Rapid Methods of Correlation—Short methods of addition, subtraction, multiplication and division. Comprehension of analogy. Component ratios of matrix—short methods. Practice—simple and compound. Percentages and averages. Combinations, permutations and odd-oddness calculations. Short methods of simple, grouped and compound interest calculations. Profit and loss. Relative Percentages. Stocks and shares. Bills of exchange. Time discount and banker's discount."

(To come into effect as from the Intermediate Examination of 1972.)

4

In Chapter XXXIX (B.A. Pass Degree Examination) of the University Code, Volume II (1958-59), page 262, insert the following after the syllabus in "Interim":—

Syllabus to Students.

1. Scope and meaning of Statistics.

2. Collection of Statistics, taking the census as an example.

3. Statistics of correlation.

(a) Necessary for classifying the data collected, degree of class interval, frequency distribution, frequency polygon, Histogram, Frequency curve.

(b) The mean, mode, median, quartiles and percentiles.

(c) Mean deviation, standard deviation and quartile deviation, measures of skewness based on them.

(d) Two variables, lines of regression and co-efficient of correlation.

4. Elementary Theory of Sampling.

Normal distribution, normal curve developed from geometric interpretation, meaning and significance of the probable error, use of the formulae for the P.E. of the mean.

5. Graphical and numerical work.

The student is expected to be familiar with the following:—

(a) Calculation of averages, deviations and correlation coefficient (using multiplication, etc., tables).

(b) Drawing Histograms and sketching frequency curves by free-hand drawing.

(c) Fitting of any probability curves by the method of least squares.

(d) Fitting of the normal curve by the method of areas.

(e) The signs and its use in the determination of the mode, median, etc.

(f) Logarithmic graphic representation (using semi-logarithmic paper).

(g) Index numbers.

Standard is in Current—First course in Statistical Method.

The following books are recommended for reference:—

1. Yule—Introduction to the Theory of Statistics—Chapters I, VI, VII, VIII, XII and XIV.

2. D. C. Jones—A First Course in Statistics—Chapters I to XIV.

(To come into effect as from the B.A. Pass Degree Examination of 1961.)

5

In Chapter XL (B.A. Hon. Degree Examination) of the University Code, Volume II (1958-59), page 215, delete the clause at the end of line 2 and insert the following between "Examination" and "degree":

"The student is to pass in the following:—"

"(a) After having completed the course student is eligible to appear for the examination in Part II under section 2 above." and add the following at the end of the section:—

"A candidate appearing under the regulation for the B.A. Degree Examination shall appear for all the parts of the examination and shall also under Part III the same optional subject which he studied for the Honours course."

(To come into effect immediately.)

20. In Chapter XLV (9 & 10 Hon. Degree Examination of the University Code, Volume II (1926-27, page 394, add the following in subsection 3, under 3. Graduate in combination Dental with the leading branches and Subjects:—
 "Elementary knowledge of anatomy and veterinary officers and a general outline of dentistry with such as surgery, dermatology, leprosy, etc."
 (To come into effect as from the B.A. Hon. Degree Examination of 1928.)

21. In Chapter XLV of the University Code, Volume II (1926-27, page 402, insert 10 (i), read "written examination" according to item 4.
 (To come into effect as from the M.B. Degree Examination of 1928.)

22. In section 95 of Chapter XLVIII, page 522 of University Code, Volume II (1926-27, add the following at the end of the section:—
 "10) Dental Surgery with attendance at 2 lectures and 6 practical demonstrations (demonstrations) of the Dental Clinic."
 (To come into effect as from the examination of 1928.)

23. In Chapter LVII (Certification) of the Code, page 437, insert the following certificate between the 10a and 10b certificates:—
 "I certify that has attended a practical course of instruction in Dental Surgery. (Three lectures and six Practical Demonstrations at the Dental Clinic).
 Signature President"

(To come into effect as from the Bachelor Examination of 1928.)

24. In Chapter I, A. 10 T. New Regulations (page 200, substitute "1936" for "1934" in line 3 of paragraph 1 under the heading "Tentative Regulations".
 (To come into effect immediately.)

25. In Chapter LVII (Certification) of the University Code, Volume II (1926-27)—
 (a) In page 432 under "15. Second M.B.E.S. Degree Examination," insert the heading "Part II" immediately after the line certificate under Part I.

(b) In the same page, at line 9 from the bottom, substitute for the words "two years after" the following:—
 "One academic year for Hygiene and Pathology and two academic years for Dental Pathology and Bacteriology subsequent to the."

(c) In the same page, line 5 from the bottom, read "a course of instruction in Practical Pathology" for "Bacteriology."

(d) In page 432, lines 1 and 2, read "a course of lectures on Bacteriology and a course of instruction in Practical Bacteriology" for "a course of instruction in Practical Pathology including Bacteriology."

(e) In the same page, line 4, read "Professor of Bacteriology" for "Professor of Pathology."

(To come into effect immediately.)

26. In Chapter XLV of the Code, Volume II (1926-27) dealing with the Regulations for Postgraduate and Research Degrees page 400, add the following as section IV and renumber the existing sections accordingly:—
 "IV. Degree of Master of Science in Applied Physics"

10. A candidate for the degree of Master of Science in Applied Physics shall be required:—

(a) to have passed the B.Sc. Part or B.Sc. (Hon.) Degree Examination at this University with Physics as the main subject at an examination of any other University accepted by the Senate in equivalent courses.

(b) to have undergone subsequently a formal course of study in the University College, embracing over a period of one academic year consisting of three consecutive terms in the case of Honours students and two consecutive years each consisting of three consecutive terms in the case of Pass students; and

(c) to have passed the prescribed examinations.

11. The course and scope of instruction shall be as defined in the syllabus provided.

12. The examinations for the B.Sc. Pass Graduates at the end of first year shall consist of three papers in theory each of three hours duration except in the case of Properties of Matter which shall be of two hours duration. Besides, there shall be two papers in practical each of three hours duration.

The three papers shall be as follows and be common with the Physics Hon. Part II M.Sc. —

1. Properties of Matter	.. "	2 hours.	10 marks.
2. Light	.. "	2 hours.	10 marks.
3. Electricity and Magnetism	.. "	2 hours.	10 marks.

The practical examinations will be conducted along with those for the Physics (I) and Part II (I) examinations and the practical examination entries 200 marks.

The candidates have to submit record of practical work done and the record shall carry 40 marks.

A candidate shall be declared to have passed the degree examination at the end of the first year if he obtains at the aggregate not less than 40 per cent of the total marks and not less than 30 per cent in each of the parts (a) written and (b) practical including record.

21. The examinations at the end of the first year for Honours Graduate and at the end of the second year for Pass Graduate shall consist of three papers in theory and three practical parts of these papers depending on the mark of the papers, viz: (1) Applied Mechanics, (2) Optical Instruments, and (3) Applied Electricity. In addition there shall be an examination in drawing. The marks shall be allocated as follows:—

Written	Three papers each carrying 100 marks	300
Practical	Three practicals each carrying 100 ..	300
Drawing	100
Practical records	100

22. A candidate shall be declared to have passed the M.Sc. degree examination if he obtains at the aggregate not less than 40 per cent of the total marks and not less than 30 per cent in each of the parts (a) written and (b) practical including drawing and record.

23. Candidates declared to have passed the M.Sc. degree examination shall be ranked in the order of preference as determined by the total number of marks obtained by each and shall be arranged in two classes:

Class I—Those obtaining 80 per cent and above.

Class II—The rest.

(To come into effect as from the M.Sc. Degree Examination of 1940.)

38

In Chapter XLV of the Code Volume II, 1938-39, page 496 read the heading "Syllabus" for "Syllabus" and add the following immediately thereafter:—

Degree of Master of Science in Applied Physics

A. *Applied Mechanics*: (a) Course of lectures: Strength of materials and properties, Features of the scientific instrument, Instrument design, Lubrication, Bearings of freedom and constraint, Bush job and its properties, Friction and lubrication, Tearing, shearing and extrusion of metals, construction, Commercial instruments including the design of gas and gauges, Different methods of welding, checking and testing mechanisms.

(b) Practical training: (i) Drawing and (ii) Workshop practice. Use of machine tools, Grinding and lapping, Polishing and finishing, Pattern making and casting, Filing and testing.

B. *Optical Instruments*: (a) Course of lectures: The telescope, The microscope, Spectroscopy, photometry, Photographic lens, Photography, Microphotometer, Interferometer, methods of testing instruments.

(b) Practical training: Using, testing and fixing the above instruments.

C. *Applied Electricity*: (a) Course of lectures: Theory of alternating currents, Measuring instruments, Illustration and testing, Theory and construction of both D.C. and A.C. generators and motors, transformers, converters and rectifiers, Theory of storing, controlling and protecting appliances, Power House and power distribution, Theory and design of D.C. and A.C. transmission and distribution systems including switch gear, Transmission wires and Photo-dynamic cells, Wireless communications, Broadcasting, Aerial systems for transmission and reception.

(b) Practical training: Working of the different machines, their tests and defects, in addition to laboratory work for an understanding of the lecture course.

39

In Chapter XVI (Three-Table) of the Code, Volume II (1938-39), page 503, add the following immediately after the first table relating to B.Sc. (Hons.) Degree Examination in Chemical Technology:—
